

Classic Wrap Slippers for Anyone - Crochet Pattern

Pattern by Jayda InStitches 2017 – Happy Crafting!

Materials

Yarn: worsted weight (size 4), ~100 g (Adult), ~70 g (Children). Acrylic, Cotton, Wool or T-shirt yarn. Red Heart Comfort used in photo.

Hook: 5.50 mm / (I / 9)

Scissors, Yarn Needle, 2 Pom Poms, Needle & Thread

Paper, Pen or Pencil, Measuring Tape, Calculator

Stitch Markers (or safety pins)

Stitch Legend

r – row

st(s) – stitch(es)

ch(s) – chain(s)

sl st – slip stitch

hdc – half double crochet

hdc2tog – half double crochet 2 stitches together

Notes (Read these before you start!)

- If you are making your own Pom Poms, leave the tails of the tie long for attaching to the Slippers
- Keep in mind that this pattern will stretch out a little, so err on the side of a bit smaller to start!
- Personal tension, individual yarn size and hook size play a big role in the sizing of your Slipper, so be sure to check your initial gauge after Row 2.

Make Your Template!

- Place the foot you are making the Slippers for on the paper and trace around the entire foot with your pencil.
- Write down the name of the person this foot belongs to!
- Measure the longest point and the widest point and make note of these measurements.
- Keep your template and pencil handy for making further notes as we go along 😊

Pattern – We begin with the Sole

Ch a length that is as wide as the widest part of your template.

R1: hdc in the 2nd ch from the hook and into each across. Ch 1, turn

R2: hdc in each st across. Ch 1, turn.

Pause! Measure your crocheted piece against your template. It should sit just inside the widest part of your template when laid flat or *slightly* stretched. If it is too wide, take it out and begin again with 1 less chain. If it is too short, take it out and begin again with 1 more chain. Continue this step until your piece fits neatly across the widest part of your template. Remember that with wear, the slipper will stretch out, so err on the smaller side.

Write down the number of chains and the number of stitches.

Repeat R2 until the Sole piece covers nearly $\frac{3}{4}$ of your foot template.

Decrease Row: hdc2tog, hdc in each st across until last 2 sts, hdc2tog. Ch 1, turn

Write down your Decrease Row number.

Repeat R2 until the Sole piece covers the entire foot template (when slightly stretched), without overage (it's ok if it's slightly smaller!).

Write down the total number of Rows (R#). Fasten off your last row, weave in ends.

Upper

1. Take the total number of rows of your Sole and multiple that number by 1.2 (R# x 1.2). Round up or down to the next whole number. **Write down this number (Side#).**

For example, if the number of rows in your Sole were 22 it will look like this:

$$22 \times 1.2 = 26.4 \text{ (so I will use 26)}$$

R1: join yarn with a sl st in the top left st of Toe section. Place a safety pin or stitch marker in this st for reference. Ch 1, hdc in the same st as joining, hdc up the raw edge of your first side. **The number of stitches you will work from Toe edge to Heel edge is your Side#.** If you're over or under 1, don't worry about it, but try and work the same number on the other side.

Continue hdc across Heel row (do NOT add extra sts in the corners!). Hdc down the other raw edge, be sure that from Heel to Toe this is the same number as the other side (take a moment and count up all the stitches in this row, write that number down for reference). Ch 1, turn

R2: hdc in each st across. Ch 1, turn

R3 – R6: hdc in each st across. Ch 1, turn. For children's Slippers, fasten off. Leave a long tail for sewing Toe.

R7: hdc in each st across. Ch 1, turn. For tween's and lady's Slippers, fasten off. Leave a long tail for sewing Toe.

R8: hdc in each st across. Fasten off for men's / teenaged boy's Slippers. Leave a long tail for sewing Toe.

Weave in short tails.

Assembly:

- Fold the right half over so that the short end lines up with the Toe.
- Fold the left half over on top of the right half so that the short end lines up with the Toe.
- Thread up long tail and sew through all three layers of Toe edge
- Weave tail back and forth (at least 3 times) through stitches of last Sole Row. Trim any excess.
- Sew or Tie in Pom Pom where left and right sides cross at top of Slipper
- Weave in tails and trim any excess

For Opposite Foot:

- Using the notes you made on your first Slipper, make a second slipper exactly as the first
- Fold left half over first, then right side before sewing up Slipper.
